## 01 Always records, scenes or events

Want all-day recording video but worry about the battery will run out too quickly? Use the AOV mode. The EB3 4G can connect and process the images captured at preset time intervals to render a continuous time-lapse video that shows you changes in the environment.<sup>4</sup> When an important human activity happens, the camera starts recording a normal video, so you don't miss an important detail.

## 02 Always protects, far or near

When the AOV is on, the camera can detect an approaching person or vehicle at a much greater distance. If a person or vehicle appears in the camera, even if they are outside the range of the PIR sensor, the camera will notice that and inform you immediately.
