

EZVIZ RE5S Plus
Robot Vacuum & Mop Combo

**Give every corner of your
home a thorough clean**

With the RE5S Plus, you no longer have to worry about tedious and repetitive cleaning tasks, as it is tailored to the needs of modern households with its extended functions. With its suction power 9,000 Pa, the RE5S Plus ensures that the floor can be swept carefully and thoroughly. The improved 3-in-1 roller brush is designed to use its full drive to remove dust without tangling hair. Even better, the wrap-around base station not only charges, but also collects and seals dust so you can work completely hands-free for up to 90 days.

Remote App Control
& Map Customization

Smart Integration with
Google Assistant &
Amazon Alexa†

Powerful suction makes deep cleaning a breeze

Ultra-strong suction power to tackle tough messes

Knowing that tough grime and light dust need powerful suction, the RE5S Plus has bumped up its suction power to an impressive 9,000Pa, more than double what the old model had.‡ Now, those stubborn dirty spots are a thing of the past.

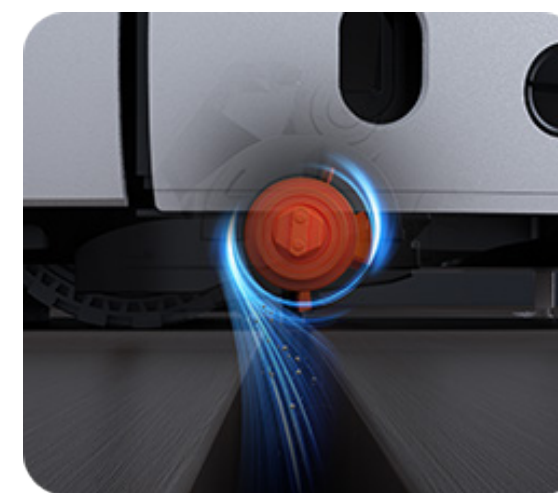

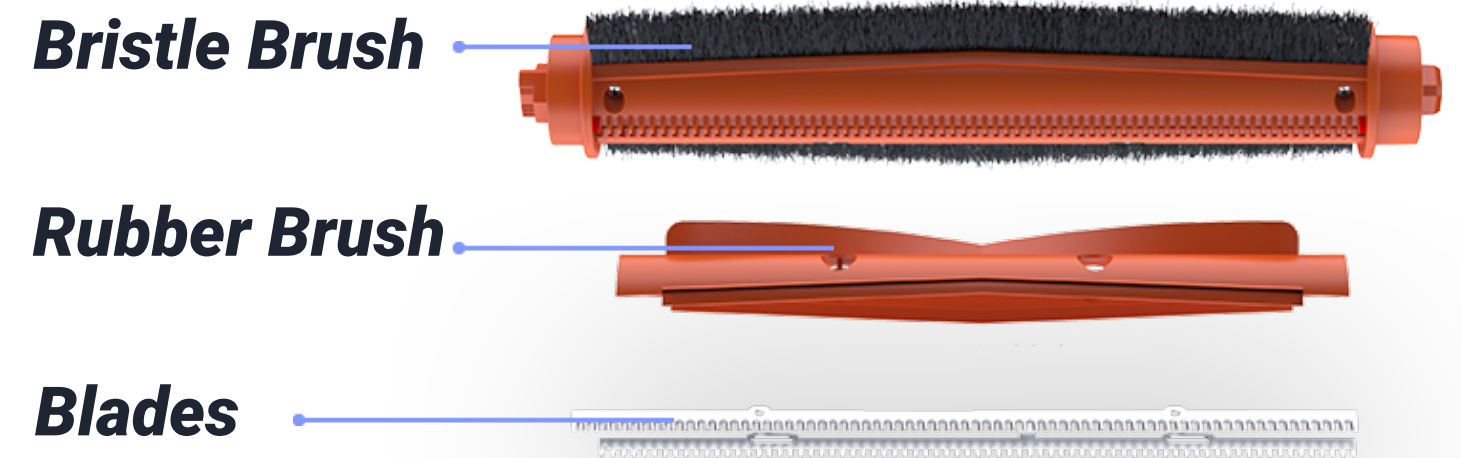

Boost the suction power to get your carpet extra clean

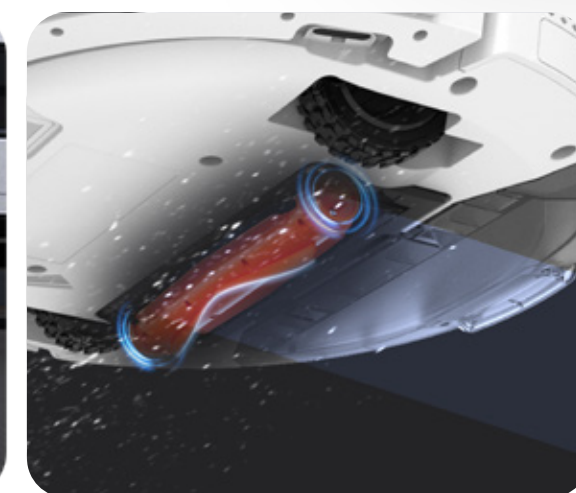

If you've got expensive carpets at home, the RE5S Plus is definitely the way to go. When it detects a carpet while cleaning, it automatically increases its suction power to get rid of any dirt or hair lurking in there.

Takes your roller brush to the next level

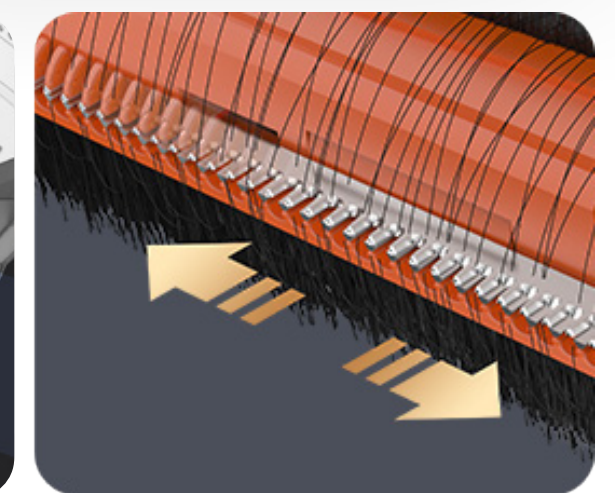

You'll be amazed at how much better the RE5S Plus cleans with its new 3-in-1 CutFree brush. It picks up hidden dirt effortlessly and hits the carpet with a full swing to loosen the stuck-on dirt without hair getting caught in the brush.

1
Brushes up hidden hair, dust & debris

2
Flaps fast to dust off the carpet (3,000 times/minute^{**})

3
Cuts free tangled hair when self-cleaning at the base station

Your dual-purpose cleaning expert

The RE5S Plus takes care of all cleaning tasks in the house by sweeping, vacuuming and mopping efficiently. Its consistent downward pressure ensures that it scrubs as hard as possible to remove everything from spilled coffee to grease stains and other sticky messes — for your convenience.

4L
Dust Bag for up to
90 days of
Hands-Free Cleaning

Empties and untangles itself, with dust all in one place

The base station self-empties the tangled waste with its advanced roller brush, so you don't have to do it manually. What's better, you can simply swap out the full 4-liter dust bag every 90 days instead of manually emptying the robot's dust bin after each cleaning mission.

Knows exactly where to go and what to avoid

Don't worry about the robot vacuum cleaner bumping into your furry friends at home. The RE5S Plus is equipped with LDS-LiDAR and infrared sensors so it can easily avoid obstacles and find the best cleaning path, even in tight spaces.

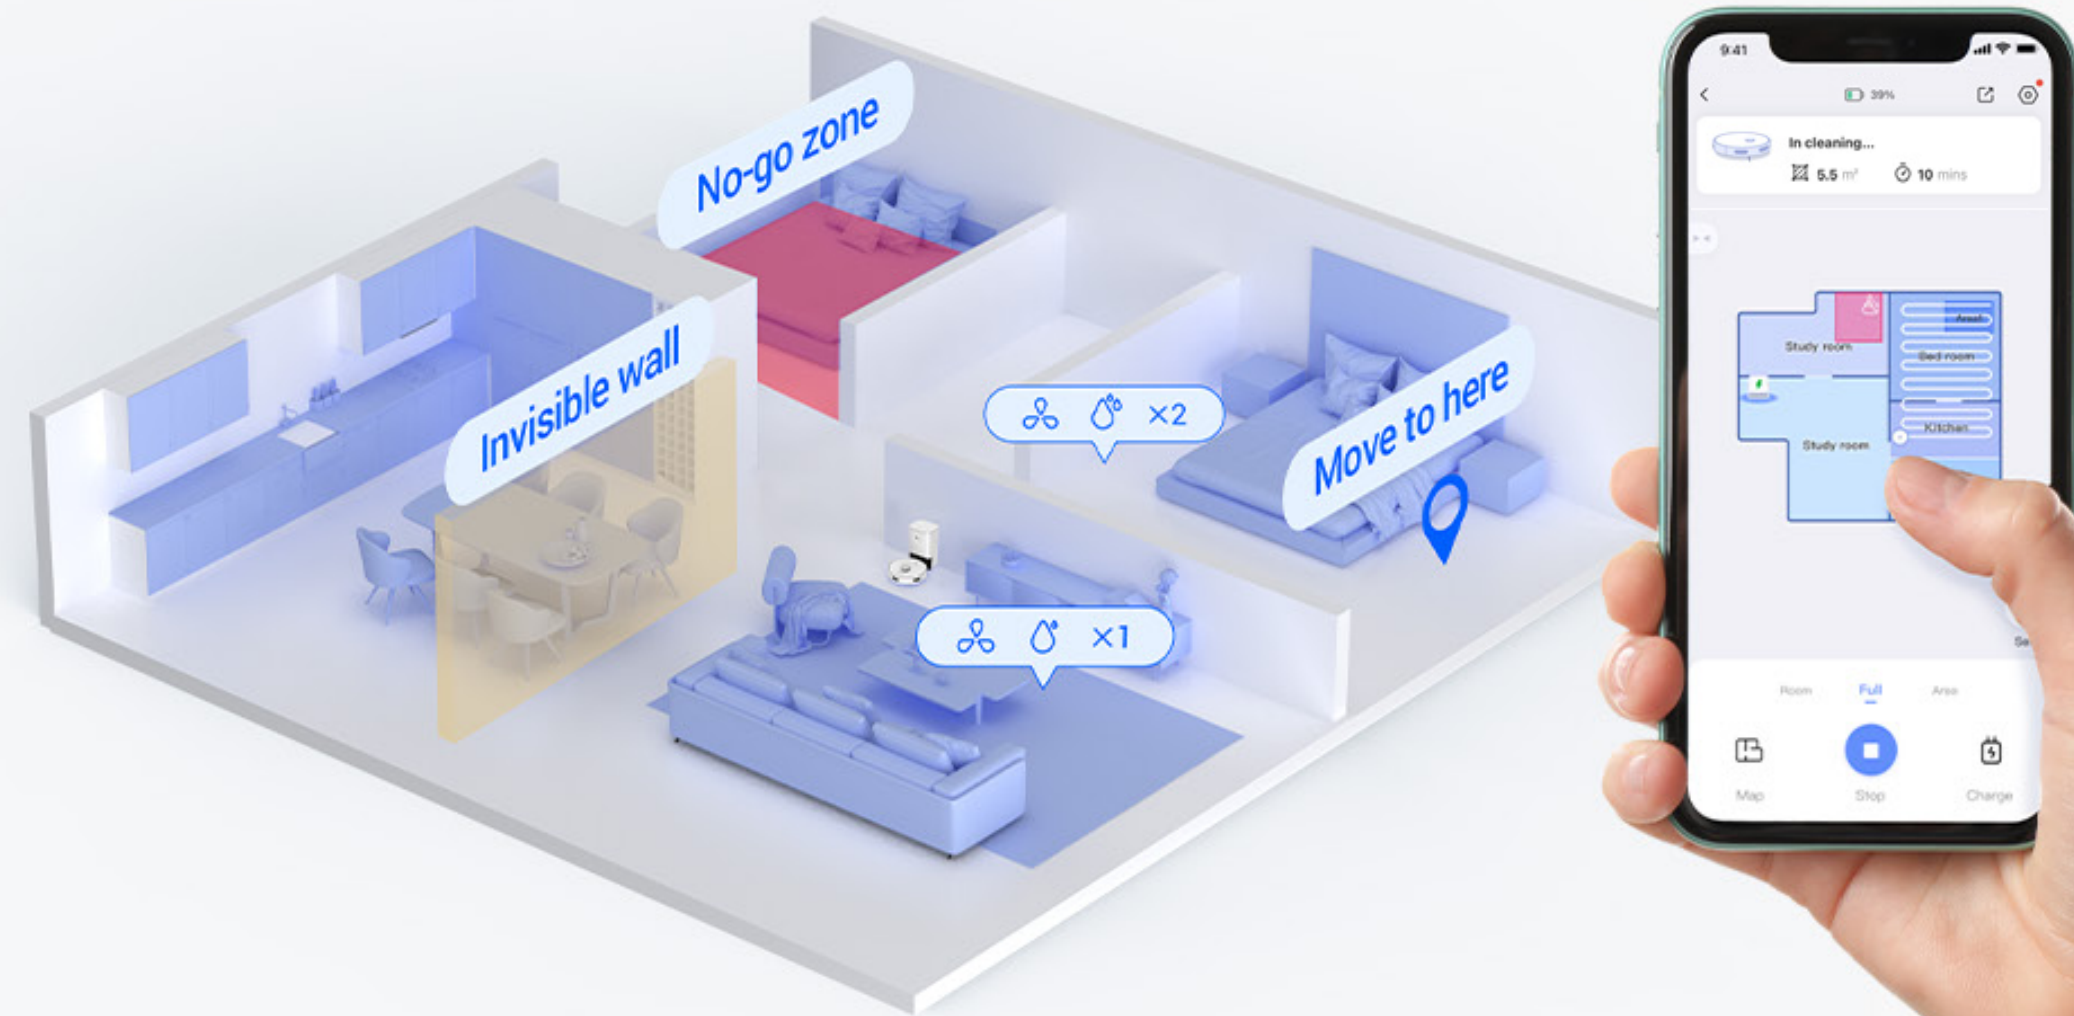

Closer Clean

Drop Sensing

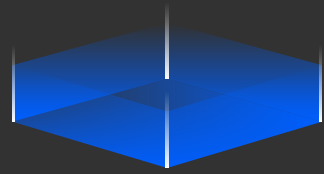

Obstacle Crossing

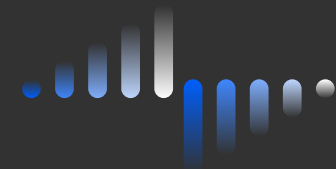

Smartly plans the best way to clean

By mapping your home, the RE5S Plus gives you a personalized cleaning experience that fits your space perfectly. With the EZVIZ App, you can easily customize floor plans for different areas or rooms, or set up cleaning tasks for your entire home.

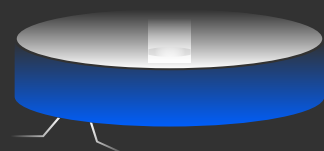

More to fit your cozy home

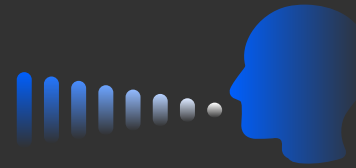

Extended runtime
covers up to **300 m²**
with one full charge^{††}

low noise level
during operation^{††}

TPE plastic
minimizes bumping
damage

*A side brush, a dust bag, and a filter are already pre-assembled in the RE5S Plus.

* Data from EZVIZ Lab test results based on the regular use of the robot. Actual emptying interval may vary depending on the use habits and environmental factors.

† Google Assistant and Amazon Alexa are not available in certain languages and countries.

‡ Data from EZVIZ Lab's test results, when compared with the EZVIZ RE5 Plus robot vacuum. By testing results, the RE5 Plus has a suction power of up to 4000Pa, which is less than half of the RE5S Plus'.

** Data obtained from EZVIZ Lab's testing results under standard conditions. Please note that the whole rolling brush operates at a speed of 1,000 rotations per minute, during which its three rubber parts flap the carpet consecutively and continuously to achieve a total of 3,000 beats.

†† Data from EZVIZ Lab test results under standard conditions. Actual battery life may vary due to the robot's battery status, dirt level and other environmental factors.

‡‡ Data from EZVIZ Lab test results under standard conditions, when the Standard Mode is enabled. Actual noise level may vary due to the robot's working modes and environmental factors.
